

Notes from **Elements of Statistical Learning**

Chapter 2: Overview of Supervised Learning

Matthew Feng

September 8, 2020 (updated: September 8, 2020)

1 Definitions

Definition 1. **inputs** (statistics: **predictors**, pattern recognition: **features**, classic: **independent variables**), are the variables that are measured or preset.

Definition 2. **outputs** are the **responses**, classically called **dependent variables**.
